

# Index

## A

Abnormal seminal vesicles, 448, 449  
Acquired renal cystic disease, 11  
Acute kidney injury, 476  
ADPKD, 22, 376  
Apoptosis detection, 200  
Apoptosis in animal models of ADPKD, 205  
Apoptosis in animal models of ARPKD, 203  
Apoptosis, 150, 197, 199  
Apoptotic cells, 199, 203, 205  
ARPKD, 14  
ARPKD-CHF, 28  
Arterial hypertension, 97  
Assembly of cilia, 381  
Atomic force microscopy, 148  
Autosomal dominant medullary cystic disease, 12  
Autosomal Dominant Polycystic Kidney Disease, 3  
Autosomal dominant polycystic liver disease, 13  
Autosomal recessive polycystic kidney disease, 12, 23

## B

Bardet-Biedl syndrome, 13  
Bax, 201, 202  
Bcl2, 202, 203  
BET bromodomain protein, 292  
Beta-catenin, 284  
Bilateral parapelvic cysts, 11  
Biliary ectasia, 27

Biogenesis, 259  
Biological efficacy, 111  
Blood pressure control, 95  
Blood pressure targets, 100  
Blood pressure, 114  
Bone formation, 461  
B-Raf, 176, 179, 183

## C

Calcineurin, 181, 183  
Calcium homoeostasis, 149  
Calcium, 169  
cAMP, 172  
Cardiovascular, 401  
Caroli disease, 23, 427, 429  
Caspase, 207  
CDK4, 183  
Cell matrix alterations, 153  
Cell polarity, 152  
Cell proliferation, 150  
Childhood PKD, 21  
Chronic inflammation, 353  
Cilia and cell cycle, 380  
Ciliary defects, 375, 382  
Ciliary function, 405  
Ciliary structure, 404  
Ciliary trafficking, 264, 268  
Ciliogenesis, 292  
Ciliopathies, 382  
Cis-autoproteolytic mechanism, 261  
Clinical biomarkers, 113  
Clinical description, 338  
Clinical features, 33  
Clinical manifestations, 399  
Clinical symptoms, 432

## *Index*

Clinical trials, 109, 114  
C-Myc, 231  
Complement -3, 345  
Congenital hepatic fibrosis, 23, 25, 27  
Consultations, 67  
Contiguous PKD1-TSC2  
    syndrome, 14  
Craniofacial, 457, 464  
Cyclic AMP, 149, 169  
Cyst formation, 37, 38, 152, 338, 408  
Cyst growth , 152, 342  
Cystic disease, 172  
Cystic kidney diseases, 22  
Cystic kidney, 400  
Cystic phenotype, 39  
Cystogenesis, 235

## **D**

Deletion of Pkd1/Pkd2, 459  
Diagnosis, 25, 75, 76, 78, 402  
Differential diagnosis, 3  
Disease progression, 341  
DNA methylation, 285, 287  
Dysfunction, 397

## **E**

EGFR, 38, 39, 40, 289  
Epidemiology, 24  
Epigenetic regulation, 285  
Epigenetic studies, 287  
Epigenetics, 283  
Epigenome, 285  
ERK, 179, 183  
Etiology, 398  
Extrarenal complications, 64  
Extrinsic death receptor  
    pathway, 201

## **F**

Fibrosis, 293  
Fluid secretion, 152  
Future therapy, 39

## **G**

Genetic connection, 431  
Genetic mutations, 76  
Genetic test , 10  
Genetics, 24  
GFR, 112, 113  
Glomerulonephritis, 471, 475, 476, 477  
GPS cleavage, 264  
GPS, 259

## **H**

HALT-PKD, 101  
HDAC5, 289  
HDAC6, 289  
Head morphology, 461  
Hematuria, 400  
Hepatic cysts, 430  
High water intake, 118  
Histone deacetylases, 287  
Homeostasis, 235  
Hypertension, 63, 97, 98, 99, 294

## **I**

Immune cell infiltration, 346  
Infections, 84  
Infertility, 450  
Inflammation in CKD, 339  
Inflammation in PKD, 340  
Inflammation, 152, 335  
Innate immune cells, 344

*Index*

Intrinsic mitochondrial pathway, 202

**K**

Kidney development, 236

**L**

Life style modifications, 67

Liver cystic lesions, 426

Liver, 401, 425

Long-term monitoring, 67

Long-term tolerability, 114

**M**

M1 macrophages, 350

M2 macrophages, 350

Macrophage activation, 350

Macrophages, 342

Male urogenital organs, 445

Mammalian head, 458

Management, 66, 432

Mast cells, 344

Mechanical stress, 460

Mechanisms of apoptosis, 200

Mechanosensory cilia, 397

Meckel-Gruber syndrome, 14

Medullary sponge kidney, 11

Megavesicles, 447, 450

MicroRNAs, 313

miR-17, 317

miR-200, 319

miR-21, 320

miRNA-based therapy, 321

Molecular abnormalities, 76

Molecular basis, 139

Mouse models, 382

MRI, 346

mTOR inhibitors, 117

mTOR, 212, 384

Multiple benign simple cysts, 11

Myc molecular function, 234

**N**

Natural history, 79, 112

Nephrectomy, 82

Nephrolithiasis, 401

Nephronoptosis, 14

Nephrotic syndrome, 474

NFAT, 178, 181, 182

NF- $\kappa$ B, 201, 202, 208, 214, 353

Niacinamide, 119, 120, 290

Nitric oxide, 410

Nocodazole, 289

Non-lymphoid cells, 351

Non-orthologous cystic mouse models, 240

Normal seminal vesicles, 446

**O**

Orofaciodigital syndrome type, 13

Orthologous PKD mouse models, 241

**P**

Pathogenesis, 197

Pathology, 26

PC1-C-terminal tail, 348

PC1-PC2 interactions, 144

PC1<sup>U</sup> and PC1<sup>cFL</sup>, 272

PH, 28

Phagocytes, 341

Phenotypic switch, 179, 180

Pkd1 mutant, 206

PKD1, 3, 139, 140

Pkd1/Pkd2 function, 463

## Index

Pkd1/Pkd2 in mastication, 460  
Pkd2 conditional knockout mice, 460  
Pkd2 mutant, 206  
PKD2, 3, 139, 140, 141  
Polycystic liver disease, 429  
Polycystin complex, 268 , 269  
Polycystin structure, 142  
Polycystin-1 cleavage, 261  
Polycystin-1, 141, 259  
Polycystin-2, 143, 347, 348  
Polycystins, 139  
Preclinical models, 110  
Primary abnormality, 178  
Primary apical cilium, 145, 147  
Primary cilia, 378, 404, 406  
Prognosis, 36  
Proteinuria, 473, 474  
Pulmonary insufficiency, 25, 28

## R

RAAS inhibitors, 99, 100  
Regulation of Myc, 233  
Renal Cilia, 382  
Renal cysts, 7, 13  
Renal fibrosis, 152  
Renal inflammation, 293  
Renin-angiotensin system, 114  
Roscovitine, 212

## S

SBM mouse model, 238  
Screening, 402  
Seminal vesicle cysts, 445  
Seminal vesicle ectasia, 447

Seminal vesicles, 443  
SIRT1, 290  
SIRT2, 292  
Sirtuin, 1, 119  
Small angle X ray scattering, 146  
Somatostatin, 116, 403  
STATs, 351  
Structure of cilia, 378  
Symptomatic polycystic kidney  
disease, 75  
Symptoms, 80

## T

Therapeutic strategies, 212  
Therapis, 402  
Therapy, 80  
Three-hit model, 149  
Threshold model, 149  
TNFR1, 207, 208, 211  
TNF- $\alpha$ , 201, 202, 207, 208  
Tolvaptan, 81, 116  
Tools to study epigenetics, 295  
Trans-arterial embolization, 81  
Transcription factors, 348  
Trans-Golgi network, 266  
Treatment, 29, 62, 75, 98, 197, 283  
Triptolide, 120  
Tuberous sclerosis complex, 12  
Two-hit model, 149

## V

Vasopressin receptor antagonists,  
115  
Von Hippel-Lindau syndrome, 12

Doi: <http://dx.doi.org/10.15586/codon.pkd.2015.ind>
